KEVIN GUZMÁN MARCA

Software Developer | Backend & Infrastructure

Tarija, Bolivia | kevin40000100@gmail.com | +591 60259580 | linkedin.com/in/kevin-guzman-marca | github.com/Kevinho71 | kevinho71.github.io/mi-portfolio

PROFESSIONAL SUMMARY

Final-year Systems Engineering student and Software Developer focused on backend development and infrastructure. I design and build software solutions that deliver tangible operational value to organizations. Used to owning the full development lifecycle end-to-end—from gathering requirements directly with stakeholders and designing the architecture to final production delivery.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, HTML, CSS.

Frameworks & Libraries: Spring (Spring Boot), React, Node.js, FastAPI.

Technologies & Infrastructure: AWS, Docker, Git, GitHub Actions, SQL & NoSQL Databases, Linux.

AI Engineering: AI Harness Development, MCP (Model Context Protocol), Agent Skills, SDD (Spec-Driven Development), Agentic Workflows, Evals.

Methodologies: Scrum, Kanban.

Soft Skills: Leadership, Proactivity, Creativity, Commitment.

PROFESSIONAL EXPERIENCE

Backend Developer Intern — Favorcito (Web Platform) *Jan 2026 – May 2026*

- Built backend modules for finance and user management areas, automating previously manual workflows for a platform serving **10,000+ registered students**.
- Developed an **AI-powered affinity matching engine** and implemented **AI-driven automations** to streamline core platform operations.
- Redesigned and expanded the architecture of existing modules to support new features and improve maintainability.
- Worked closely with Team Leads on technical design decisions and sprint planning.

Full-Stack Developer (Volunteer) — Laboratorio DTT, UCB Sede Tarija *Dec 2024 – May 2026*

- Developed the **UCB Vocational Orientation Platform** (front-ov-dev.alexa.tja.ucb.edu.bo) end-to-end, automating the evaluation and reporting of **MIDAS and CHASIDE psychometric tests** for **140+ high school students** across **6+ schools** in Tarija.
- Configured and maintained **CI/CD pipelines** across multiple laboratory software projects.
- Collaborated on diverse software development initiatives and provided hands-on technical support to students.

Full-Stack Developer (Freelance) — CADET (cadet.org.bo) *2025 – 2026*

- Led requirements gathering, architectural refactoring, legacy system redesign, and data migration for the institution's production platform (cadet.org.bo).
- Built a public landing page, an integrated **CMS**, and a comprehensive **backoffice system** digitizing member records, companies, payments, courses, documents, posts, and scheduling.
- Created a LinkedIn-style professional profile directory for members, actively supporting **500+ registered members** and **50+ affiliated companies**.

Full-Stack Developer (Freelance) — Clinical Management System, UCB Sede Tarija *2026*

- Led requirements elicitation and the end-to-end digitization of the university's psychology clinic (gabinete-psi-f.alexa.tja.ucb.edu.bo), building modules for patients, psychological tests, clinical sessions, medical histories, reports, scheduling, and an analytics dashboard.
- Integrated **AI agents** to triangulate scattered patient data, assist in psychological analysis, and draft clinical reports—serving as a decision-support tool for psychologists.

EDUCATION

B.Sc. in Systems Engineering — Universidad Católica Boliviana (UCB), Tarija *2022 – Present*

Academic Exchange (Full Tuition Scholarship) — Pontificia Universidad Javeriana, Bogotá, Colombia *2024*

English Proficiency Program — Centro Boliviano Americano (CBA) *2018 – 2021*
