KEVIN GUZMAN MARCA

Backend Developer Intern | Java Spring Boot | Python | REST APIs | SQL & NoSQL

Tarija, Bolivia | kevin4000100@gmail.com | +591 60259580 | linkedin.com/in/kevin-guzmán-marca-730b88301 | github.com/Kevinho71 | kevinho71.github.io/mi-portfolio

PROFESSIONAL SUMMARY

Full Stack / Backend-focused Systems Engineering student (graduating 2027) with hands-on experience building and shipping production backend services for real institutions and companies. Comfortable across the full backend lifecycle: REST API design, relational and NoSQL database modeling, authentication (JWT/OAuth2), versioned database migrations, and Docker containerization. Delivered 4 production systems from scratch as sole or lead backend developer, including a live administrative platform (cadet.org.bo) currently in use. Strong problem-solving skills, Git/GitHub workflow discipline, and proven ability to work independently and remotely on real client deliverables and deadlines.

TECHNICAL SKILLS

- **Backend Languages & Frameworks:** Java, Spring Boot, Spring Security, Spring Data JPA, Spring AI, Python, FastAPI, JavaScript, TypeScript, Node.js, Express.js
- **APIs & Web Services:** RESTful API design and implementation, JSON, JWT authentication, OAuth2 (Google), role-based access control (RBAC), API documentation with Swagger / OpenAPI
- **Databases (SQL / NoSQL):** PostgreSQL, MySQL, SQL (schema design, joins, JSONB) | NoSQL: MongoDB, Firebase
- **Database Migrations:** Flyway, Liquibase (versioned schema migrations)
- **DevOps & Infrastructure:** Docker, Docker Compose, multi-stage builds, AWS (learning/hands-on), Linux, MinIO (object storage), Nginx
- **Version Control & CI/CD:** Git, GitHub (branching, pull requests, code review workflow), GitHub Actions (CI/CD pipelines)
- **Frontend (integration):** React 19, React Router, Tailwind CSS — for full-stack integration with backend APIs
- **Soft Skills:** Complex problem-solving, analytical thinking, remote/async collaboration, clean and reusable code, technical documentation, agile methodologies, team leadership

PROFESSIONAL EXPERIENCE

Backend Developer Intern — Favorcito (Web Platform) *Jan 2026 – May 2026*

- Developed and maintained backend services and REST APIs for a live web platform, working independently in a remote environment.
- Collaborated with the existing team to integrate backend logic with front-end requirements and debug production issues.

Full Stack Developer (Volunteer) — Laboratorio DTT — UCB Sede Tarija *Dec 2024 – May 2026*

- Assigned as lead developer on the Vocational Orientation Platform: a Spring Boot 4 + PostgreSQL backend supporting passwordless OTP login and Google OAuth2 authentication.
- Designed a JSONB-based scoring engine for two psychometric tests (MIDAS, CHASIDE) with configurable scoring tables.
- Built async email notifications, PDF/Excel/ZIP bulk report generation, and public unauthenticated endpoints accessed via QR codes.
- Documented the API with Swagger/OpenAPI; deployed with Docker Compose across dev and production environments.
- Deployed and actively used in real vocational orientation campaigns across schools in Bolivia.
  Live in production: https://front-ov-dev.alexa.tja.ucb.edu.bo (institutional access, public up to login)

Freelance Full Stack Developer — CADET — Colegio de Administradores de Empresas de Tarija *2025 – 2026*

- Built a production REST API with Spring Boot 3.5 and PostgreSQL powering member affiliation, FIFO-based payment logic, scheduling, and a role-based virtual office for 3 user types (admin, member, public).
- Designed the relational schema and managed versioned migrations with Flyway; integrated MinIO for document/file storage.
- Replaced fully manual, paper-based workflows with automated digital processes; system is live in production and actively used by the association.
- Containerized backend and services with Docker for consistent deployment.

  Live in production: https://www.cadet.org.bo

Freelance Full Stack Developer — UCB Sede Tarija — Gabinete Psicológico (Clinical Management System) *2026*

- Built 40+ REST endpoints with Spring Boot 4 and PostgreSQL to manage patient records, clinical sessions, and analytics for a university clinic.
- Implemented JWT authentication, BCrypt password hashing, and role-based access control (ADMIN / PSICOLOGO).
- Integrated Google Gemini via Spring AI to auto-generate clinical summaries and vocational reports from structured data.
- Wrote 16 versioned Flyway migrations across a 15-entity relational data model; automated Word/Excel/PDF report exports.
- Deployed and running in production for the university's psychology department.

  Live in production: https://gabinete-psi-f.alexa.tja.ucb.edu.bo (institutional access, public up to login)

EDUCATION

B.Sc. in Systems Engineering — Universidad Católica Boliviana (UCB) — Tarija, Bolivia *2022 – Present (Expected 2027)*

Academic Exchange — Full Tuition Scholarship — Pontificia Universidad Javeriana — Bogotá, Colombia *2024*

English Proficiency Program — Centro Boliviano Americano (CBA) *2018 – 2021*
